UNISON KEY CABINET MANAGEMENT – PROXSAFE INTEGRATION

MAIN FEATURES

- ▶ Manage all your valuable keys and assets from a single user interface
- ▶ Assign access to individual keys and fobs
- ▶ Raise an alarm in Unison when a key is pending and has been returned late
- ▶ All events and alarms appear in the Unison event log
- ▶ Generate reports that outline all key activity
- ▶ Ability to set temporary access restrictions while using a key
- ▶ Support for automatic upload of configuration data

PACOM Unison provides you with an unparalleled graphical user interface for managing all your security and building needs in one easy to use solution. This includes management for intrusion detection, access control, fire systems, video management and verification, intercom management, building controls, and keys and assets.

PACOM UNISON

With large amounts of information from different applications, it is crucial to use a system that offers a simple and intuitive user interface. This allows the operator to respond to various types of events in a fast and secure manner. In a powerful way, Unison presents information from different sub-systems in a common user interface. Unison is a Windows-based client / server system with a graphical layout that can be recognized from the traditional Microsoft Office environment.

Unison's ease of use is high lightened by the large amount of graphical features supported by the system. CAD drawings can be imported and icons can be placed in different layers of the drawing to symbolize devices like cameras, intercoms and card readers. The graphics make the system user friendly, reduces training requirements and minimizes the risk of incorrect decisions. When integrating with a fire, intrusion or other subsystem, the task of manually programming hundreds, if not thousands, of different objects is time consuming, repetitive and tedious. Unison intelligently uploads the configuration minimizing data entry and programming errors and significantly speeding up commissioning.

DEISTER ELECTRONIC PROXSAFE

Deister Electronic is an innovative, family owned global business for nearly 40 years experience in developing electronic and mechanical products for security and industrial automation. Widely acclaimed for our expertise and specialist implementation of RFID technology within practical applications, from key management, access control and long-range identification (AVI) to logistics and process control.

ProxSafe flexx is a modular solution, allowing you to create any system size for your own perfect solution by combining various types of housings and keyPanels. Any size system from 16 slots to thousands with numerous configurations can be realized.

Key Management

DESCRIPTION

The integration between PACOM Unison and Deister Electronic proxSafe allows for extensive key management at facilities such as data centers, healthcare facilities, universities, municipalities, governments and other similar applications. The user presents an access card to a reader in order to open the key cabinet and access a selected key. All actions and events are logged in Unison and can be accessed at any time. Unison can be configured to activate an alarm if a key is not returned to the cabinet on time. In addition, Unison can be programmed to activate an event once a key is borrowed or is returned late.

The proxSafe integration has support for automatic upload of configuration making it efficient to upload data to user tags or update time schedules.

COMPATIBILITY

Unison	V5.8
Supported Hardware/Software	DatacommEngine (Version: 4.2.4.1151), Commander (Version: 4.2.4.1151) Terminal Hardware Version 3.0, Terminal Software Version 2.45, ProxSafe Maxx 32 Cabinet
Supported SDK/API	Deister Web Service
Supported Protocol Version	Interface via Deister Web Service

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 001 001	USN-STD	Unison Standard. Includes license for one Unison client workstation.
110 001 002	USN-ENT	Unison Enterprise. Includes license for one Unison client workstation.
110 002 008	USN-KEY	Unison Key & Asset Module. Includes support for 25 keys/assets.
110 003 008	USN-KEY-25	Unison license for additional 25 keys/assets.
